

2026 Conference Session Proposal

Growth and Transformation through Institutional Research

The mission of the Alabama Association for Institutional Research is to offer professional opportunities for anyone involved in IR, IE, assessment, planning, or student records. We invite and welcome anyone to become actively involved in the organization so that we can work together to help our institutions effectively serve our students. We invite our colleagues to contribute in actively sharing their knowledge and skills by facilitating a conference presentation or discussion.

Our 2026 ALAIR Conference activities have been designed to promote knowledge sharing, solutions, and collaboration between professionals with responsibilities related to creating optimal learning environments for Alabama post-secondary students through the systematic collection and use of data. The event will be held March 11th-13th, 2026 at Southern Union Community College in Opelika, Alabama.

Institution/Organization Name:

Name(s) of Facilitator(s):

Address:

City:

State:
